Most people have 30–150 digital accounts they forget about - your digital life is bigger than you think.

It's not just social media - it includes your money, memories, subscriptions, and access to important accounts.

## The problem?

Most families don't even know these accounts exist.

This checklist will help you uncover everything.

## So what is a Digital Legacy?

Your digital legacy includes everything you leave behind online:

- Social media accounts
- Photos and personal memories
- Online payments and crypto
- Subscriptions and memberships
- Websites, domains, and income sources

If no one knows these exist, they may be lost forever.

# What Happens If You Don't Plan?

Accounts may become inaccessible

Lost financial assets

Subscriptions continue charging

Important files and memories can be lost

Your family is left guessing

Accounts may be hacked or taken over by others

04

# How to use the checklist?

05

1. Mark what you currently use

2. Decide what should happen to accounts  
(if you can no longer access or manage it)

-  Delete it
-  Keep active it
-  Transfer access to someone
-  Save it as a memory

3. Appoint a “digital executor”  
(someone you trust to manage your instructions)

Take your time, this is important.
